PATENT  
09/899,453

Please amend the claims to read as follows:

- 1 1. (currently amended) In a World Wide Web (Web)  
2 communication network with user access through a plurality  
3 of data processor controlled user interactive receiving  
4 display stations, a system for buying products offered from  
5 Web sites comprising:  
6 means at a receiving display station for displaying a  
7 Web page accessed from a Web site;  
8 means for selecting a product offered for sale from  
9 said Web page;  
10 means for storing at said receiving station, a set of  
11 predetermined search queries respectively to each of a set  
12 of Web database sites for data related to attributes of a  
13 selected product; and  
14 means responsive to a selection of a product for  
15 automatically sending said search queries to said Web  
16 database sites to thereby provide a purchase profile of the  
17 product.
2. (cancelled)
- 1 3. (original) The Web system for buying products of claim 1  
2 wherein one of said search queries is sent to a database Web  
3 site providing data on the quality of the Web sites offering  
4 products.

3

PATENT  
09/899,453

1 4. (original) The Web system for buying products of claim 1  
2 wherein one of said search queries is sent to a database Web  
3 site providing data on the quality of the selected product.

1 5. (original) The Web system for buying products of claim 1  
2 wherein one of said search queries is sent to a database Web  
3 site providing data on the comparative price of the selected  
4 product at a plurality of Web sites offering the product.

1 6. (cancelled)

1 7. (currently amended) In a Web communication network with  
2 user access through a plurality of data processor controlled  
3 user interactive receiving display stations, a method for  
4 buying products offered from a plurality of Web sites  
5 comprising:  
6 displaying a Web page accessed from a Web site at a  
7 receiving display station;  
8 selecting a product offered for sale from said Web  
9 page;  
10 storing at said receiving station, a set of  
11 predetermined search queries respectively to each of a set  
12 of Web database sites for data related to attributes of a  
13 selected product; and  
14 automatically sending said search queries to said Web  
15 database sites responsive to a selection of a product to  
16 thereby form a purchase profile of the product.

8. (cancelled)

5

PATENT  
09/899,453

1 13. (currently amended) A computer program having code  
2 recorded on a computer readable medium for buying products  
3 offered from a plurality of Web sites in a Web communication  
4 network with user access via a plurality of data processor  
5 controlled interactive receiving display stations, said  
6 program comprising:

7 means at a receiving display station for displaying a  
8 Web page accessed from a Web site;

9 means for selecting a product offered for sale from  
10 said Web page;

11 means for storing at said receiving station, a set of  
12 predetermined search queries respectively to each of a set  
13 of Web database sites for data related to attributes of a  
14 selected product; and

15 means responsive to a selection of a product for  
16 ~~automatically~~ sending said search queries to said Web  
17 database sites to thereby form purchase profile of the  
18 product.

14. (cancelled)

1 15. (original) The computer program of claim 13 wherein one  
2 of said search queries is sent to a database Web site  
3 providing data on the quality of the Web sites offering  
4 products.

1 16. (original) The computer program of claim 13 wherein one  
2 of said search queries is sent to a database Web site  
3 providing data on the quality of the selected product.

AUS920010338US1

PATENT  
09/899,453

1 17. (original) The computer program of claim 13 wherein one  
2 of said search queries is sent to a database Web site  
3 providing data on the comparative price of the selected  
4 product at a plurality of Web sites offering the product.

1 18. (cancelled)

1 19. (currently amended) The computer program of claim 18  
2 wherein said Web browser program further includes a plug-in  
3 program including:

4 said means for storing a set of predetermined search  
5 queries respectively to each of a set of Web database sites  
6 for data related to attributes of a selected product; and

7 said means responsive to a selection of a product for  
8 automatically sending said search queries to said Web  
9 database sites.

1 20. (original) The computer program of claim 19 further  
2 including:

3 means for adding or deleting predetermined search  
4 queries to said set of queries; and

5 means for adding or deleting Web database sites to said  
6 set of Web database sites.
